DELTA POINT
HIGH PERFORMANCE

HSS-M2 DELTA POINT ~ DRILLS FASTER, LASTS LONGER
INCLUDES BONUS HSS STEP DRILL

The Delta Point drill bit is completely unlike traditional chisel point and split point drill bits. Delta Point drills have a multi-faceted cutting tip. The overall length of the cutting edge of Delta Point significantly exceeds that of conventional split point drills of comparable size. Although the final design might look complicated the results are simply extraordinary.

QUICK SILVER®

HSS-M2 118° SPLIT POINT

Split point is self centering and reduces the need for end thrust. Friction at workpiece is reduced. 118° point angles are ideal for use in materials such as mild steel and cast iron. The 118° point creates easily controlled chips which are wide and thin. Bright finish tools have no surface treatment and are supplied in the as-ground condition. These tools are suitable for general purpose use, particularly for non-ferrous applications.

COBALT TOUGH

HSS-Co5 (COBALT) 135° SPLIT POINT

The 135° point provides superior performance in harder steel materials especially in deep hole applications. In these situations it will produce thicker chips minimising work hardening of the cavity. Faster penetration reduces abrasion and friction along the cutting edges. Cobalt HSS drills are extremely hard and provide superior performance and increased tool life especially in stainless steel and high tensile steel.

BLACK KNIGHT®

HSS-M2 118° SPLIT POINT

Split point is self centering and reduces the need for end thrust. Friction at workpiece is reduced. 118° point angles are ideal for use in materials such as mild steel and cast iron. The 118° point creates easily controlled chips which are wide and thin. Black finish tools are generally recommended for ferrous applications where the oxide layer aids chip flow and heat dissipation.

STEEL WIRE

These brushes are suitable for a range of general applications in the paint, welding, and automotive trades. They are constructed using tempered steel wire and are the most economical general purpose brush.

STAINLESS STEEL WIRE

Stainless steel wire scratch brushes are primarily used for metal finishing on smooth surfaces such as plating. The stainless steel wire is non-corrosive and suitable where hygiene requirements are a consideration or where moisture is present. Stainless steel wire scratch brushes are predominantly used in the welding or painting industries. Stainless steel wire resists oxidation and rusting.

BI-METAL HOLE SAWS

Bordo bi-metal hole saws are premium quality, general purpose saws suitable for a wide variety of materials and applications. The high-speed steel cobalt (HSS-Co) cutting edge provides shock resistant teeth and resists tooth strippage. 4/6 positive tooth configuration allows for fast, smooth cuts and less vibration.

FEATURES

- HSS-Co Cobalt cutting edge.
- 4/6 variable tooth configuration.
- 48mm (1-7/8") depth of cut.
- 5mm (3/16") thick heavy-duty backing plate eliminates need for drive plate.

RIPPER HEAVY DUTY TUNGSTEN CARBIDE TIPPED HOLE SAWS

Ideal for cutting timber and all types of composite board, particularly MDF. Ripper hole saws are also suitable for cutting wood laminates, plywood, insulation and fibre cement sheet.

FEATURES

Heavy duty abrasion resistant tungsten carbide teeth will cut materials that quickly dull normal hole saws. Heavy duty construction for long life with large gullets for easy slug removal.

HSS ANNULAR CUTTERS

Annular Cutters achieve burr-free finished holes without the need for pre-drilling or step drilling. Faster and more accurate than using standard HSS twist drills. Bordo Annular Cutters are CNC ground and feature multi-cut geometry for smooth and fast cutting. The precision ground flutes run the entire length of the cutter providing efficient chip removal.

FEATURES

Extended tool life.
Close tolerance drilling without runout.
Reamed quality, burr free finished holes.
Universal shank suits all popular machines.

THINWALL SHEETMETAL HOLE SAWS

Ideal for the electrical and plumbing tradesman. Each hole saw has a thin 0.65mm sidewall blade thickness, which allows for faster cutting and longer battery life. Ideal for chargeable impact drivers. Smooth and fast cutting — especially designed tooth geometry assures increased performance and better wear resistance.

FEATURES

M42 material with special variable pitch tooth design for smoother cuts in sheet metal.
Self ejecting plug removal.
1/4" quick change shank, ideal for use with battery operated impact drivers.
Safety collar stop helps prevent cutting too deep, and prevents damage to wires when drilling into electrical boxes.

E-Z CHAMFER M2-HSS CHAMFER TOOL

Create a perfect chamfer for:

- starting a nut on a bolt or threaded bar.
- starting a button die or die nut on rod.
- creating a leading edge on timber dowel.

E-Z Chamfer efficiently removes burrs and ridges from bolts, pipe, threaded rod, bar and dowels. It is suitable for use on metals including mild and hardened steels, stainless steel, copper and brass, as well as timber, fibreglass and plastics.

E-Z Chamfer prevents sparks and burns. When used correctly at low RPMs the tool will not overheat the workpiece. Threads and burrs are sheared off creating the perfect chamfer for starting a nut or threading die.
