## Innovative Handrail Fittings

Uni-Fit provides a comprehensive range of handrail fittings and guardrail, offering a compliant & simple alternative for every fencing and handrail project. Uni-Fit fittings streamline installation with their unique multi-directional adjustment capabilities, allowing quick no-weld fitment onsite to suit any stair angle or ground configuration!

Our expanded product range ensures we have the right component for every handrail or guardrail application. Ideal for applications such as balustrades, stair rails, bike rails, fall/edge protection and much more! Supported by a 5 Year Warranty, the Uni-Fit range is engineered for durability, ease of use, and cost-effectiveness.

Uni-Fit is committed to maintaining large stock holdings across two main warehouses (Melbourne & Sydney) and our standard stock range is complemented by our cutting edge, automated manufacturing facility to ensure we have a solution for every application!

***Removing complexity from every handrail project with a range of innovative components for quick & compliant installation.***

### AUSTRALIAN STANDARDS COMPLIANT

The Uni-Fit range has been extensively tested to ensure compliance to all relevant Australia Standards! Our range can be configured to meet the requirements of AS1657-2018, AS1428.2 and AS1170.1 and our team can assist to ensure compliance with the relevant sections of BCA and DDA for your project! With a focus on ensuring compliant disabled access across Industrial, commercial & residential settings, make sure you reach out to our team today to discuss your project requirements!

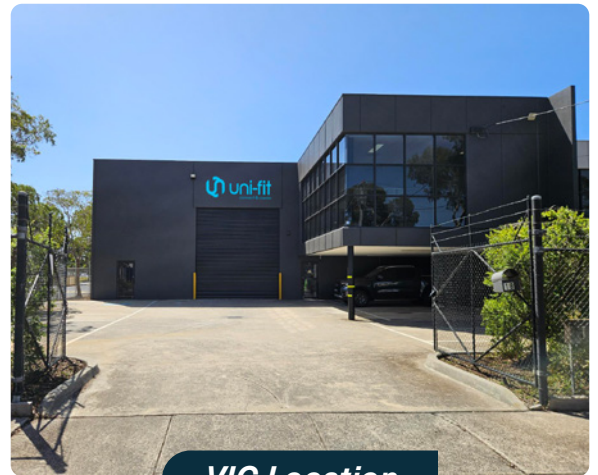

# UNI-FIT MANUFACTURING

The Uni-Fit range of fittings is sourced from globally renowned manufacturers with a focus on stringent quality control and state-of-the-art production technologies! However, we complement the Uni-Fit components with our in-house steel pipe manufacturing capabilities allowing us to supply a solution for every application! By leveraging robotic manufacturing techniques and continuous process improvements, we deliver durable, cost-effective solutions that meet the evolving demands of our customers. We're continuously designing new products and developing smart and effective solutions that keep us at the forefront of the handrail industry
